Basic Formal Ontology (BFO)

The shared upper ontology spanning both sides (business and system), providing the categorial framework for everything on the architecture.

Foundation:
BFO 2020 (ISO)
IFO / OWL / Basic Formal Ontology (Kurt Gödel)

GENERALISES	STORE
BFO	Kurt Gödel Node

Business Domain Ontologies (BDO)

Specific to domain:

BDO specialises BFO. It draws its top-level categories from BFO and populates them with domain-, management-information, process, etc.- and customer-/user-items.

GENERALISES	SPECIALISES	STORE
BFO	BFO	Kurt Gödel Node

Categorial constituent

System Ontological Categories (SOC)

Specific to domain:

SOC specialises BFO. It draws its top-level categories from BFO and populates them with domain-, management-information, process, etc.- and customer-/user-items.
